

# FOCP Fiber Optic Cleaning Platform User Manual

## Products introduction

FOCP Fiber Optic Cleaning Platform adopts lint-free wiping material which can be used in both wet and dry way. FOCP Fiber Optic Cleaning Platform is applicable to clean optical fiber coating, connector end-face, fusion splicer, OTDR, and other fiber optic equipment parts. It can be also used in the cleaning of laboratory, dust-free workshop, etc. The cleaning effect is better when used with alcohol.

## 1 Applicable for various optical fiber connectors

## 2 Wet-to-dry Combination Cleaning

Wet-dry dual use

Wipe bare fiber directly

## 3 Use in multiple scenarios

Clean the screen of instrument

Clean the compact parts

Clean the surface of instrument

Clean the fiber cleaver

## 4 Products Characteristic

- Thick non-woven fabric material, lint-free.
- Clear breakpoints, easy to tear and use, control the amount of usage reasonably.
- Replaceable cleaning core is more economical.
- Soft texture, wet-to-dry combination cleaning.
- Absorbs water stains for dry use, does not generate swarf and scratch the surface of the machine.
- Remove the oil and dust when used with alcohol.
- High water absorption, soft and tough

## 5 Product Feature

Product material	Lint-free wiping material
Scope of application	FC/SC/LC/ST/Bare fiber
Cleaning Times	220 perforated wipes > 1000+ cleans
Product Size	70mm*70mm

## 6 Tips

 Please read all instructions and warnings before using this product, improper use will damage the product or personal safety.

- 1) Do not reuse the cleaning cloth, otherwise its cleaning ability will be reduced.
- 2) Do not expose the product to direct sunlight, high temperature or high humidity.
- 3) After use, place it in a dry and clean place to prevent the contamination.
- 4) Do not wipe the fiber connector directly on the rubber buffer, otherwise the connector will be damaged.

## Standard Configuration

- Fiber Optic Cleaning Platform, certificate of compliance.
